Jefferson Miranda A.

Full stack Developer (Frond-End / Back-End)
JavaScript | Typescript| ReactJS

Resume

Experienced **Full Stack Developer** with 12+ years delivering scalable, efficient, and user-focused **software solutions**. Specialized in **JavaScript, ReactJS, NodeJS, Typescript and API** development. Proven track record working on cross-functional, remote teams. **Strong self-management skills, proactive communication, and commitment** to delivering real business value through technology.

Experience

○ **July 2013 - January 2023**

System Coordinator at Tesalia CBC. https://tesaliacbc.com/

- Engineered scalable software solutions for operational and commercial use, optimizing processes across departments.
- Led development of mobile and web applications for market asset tracking, travel expense management, and real-time KPI reporting using Node-RED and WordPress.
- Supported SAP DSD module rollouts and managed 1,400+ mobile devices.
- A 90% efficiency improvement was achieved by implementing a manager to control the organization's mobile devices (1.5k devices).
- Built an RPA where we validate 100% of master data with the tax entity.
- Closed system vulnerabilities related to product loss through security and process redesign.

   Projects Technology: React JS, Javascript, Redux, API, Laravel, Shell, Android Studio, Wordpress, JSON, MS Project.

○ **December 2010 - June 2013**

System Analyst at SYL Trading Company.

- Transitioned manual sales processes to fully digital with mobile devices and middleware.
- Deployed 350 handhelds and improved field productivity across sales teams.
- Introduced system features that boosted software performance and team satisfaction.

   Projects Technology: Javascript, HTML, CSS, SQL-Server, Oracle 9i, 12c, Shell.

○ **February 2010 - December 2010**

System Analyst at Birobid S.A.. https://birobid.com/

- Designed custom websites and shopping cart systems for SMEs.
- Created a financial control module for the agriculture sector.
- Provided tech support for internal and remote users.

   Projects Technology: HTML, JavaScript, CSS, PHP, SQL-Server, MySQL.
